## A Flexible Solution to Assure Quick and Accurate Imaging.

Gymie-R, the latest Innovation in flexible image receptor holders by J2 Medical is a solution that x-ray can now take for granted. Simply lock a receptor up to 14"x17" into Gymie's patent pending design and spin, lower, twist, push, raise, angle, or place it easily into any desired position. You will be amazed how the superior flexibility of Gymie makes a good Technologist great... and great Technologists save time, money and are safer.

Gymie-R Accommodates:

- DR Panels
- CR Cassettes
- Film Cassettes

**How is the Gymie-R Different from the other Holders?** Simple.

- 360 degree, 6 axis unlimited positioning
- Above. Beside. Or even below the table
- Increases workflow
- Eliminates improvised positioning and "holding"
- Reduces repeats and excess radiation
- Improves upright pediatric positioning
- Angle indicators help eliminate clipped anatomy
- Assisted air positioning assures ease and accuracy
- Quickly spins and rotates under table without unclamping
- Doesn't utilize valuable table space
- Unlocks technologist's freedom and creativity

### Where can you Use The Gymie-R?

Gymie can be used in a variety of locations. Inside the Hospital, Gymie is used in emergency rooms, radiographic rooms, and will soon make its way into operating rooms with the release of Gymie-Surg. Outside of the Hospital Gymie improves imaging in Clinics, Private Practices, Imaging Centers, Veterinarian Offices, Chiropractic Clinics, and more.
